Hi Robert,

I have made a couple changes to the draft TD for CFAC. Please take a look and get back to me with the final version. You can set up the Smurfit TD the same way and I can forward the projects to Skeo when I get back to the office the week of July 11<sup>th</sup>.

Let me know if you have any questions.

Thanks,

---

**Subject:** CFAC TASC phase II

Hey Sisay,

Nice talking with you today. Attached is a draft of the TASC technical directive for the CFAC CIP development project, phase II.

Based on our conversation, I understand that continuity of this project depends on funding availability that may not clear until later in the summer. No problem, we are flexible.

Let me know if you have guidance on the draft directive. I wrote the support description based on my review of the documents SKEO submitted. I took out all references to CAG development (we can address this down the road if viable).

Thanks!
